

ASTON MARTIN

External Job Advert

Workshop Technician

Department: Parts Operations
Based at: Wolverton Mill
Reports to: Workshop Controller

Job Purpose:

To assist with the production of in-house produced components for the Parts Department, supporting low volume manufacturing for current and non-current Aston Martin cars.

Key Responsibilities & Tasks:

- Obtain components from the warehouse ready for workshop assembly.
- Assembly of a large variety of low volume mechanical and electrical assemblies. Working from process sheets and drawings. Setup equipment, tooling and fixtures as required.
- Programming of electronic control modules.
- Operate instrument pack diagnostic equipment to add mileage to instrument packs using both computer based and mechanical systems. Assist with testing rebuild and repair of customers original units.
- Operate engraving machine to produce high quality plaques using a computer based system. Including tool setup and replacement.
- Stamp replacement VIN plates and chassis floors for Heritage and current vehicles using appropriate jigs and stamps.
- Operate key cutting machines to support a fast turn around of customer replacements. Including setup, cutter changing, inputting codes and key assembly.
- Build up lock sets for stock and special order for Heritage and current model variants using the specialist tools, jigs and fixtures provided.
- Operate scanning and plotting equipment to assist with the management of archive drawings, including scanning and distribution. Provide other archive material on request from the purchasing team.
- Operate laser etching equipment to create high quality laser finish sill/build plates. Set up machine and help maintain stocks of all laser materials.
- Support rework projects including current production parts. Liaise with production staff at all levels to ensure correct method of construction.
- Liaise with Sales, Heritage and Purchasing departments to assist with the setting up of aftermarket exchange programs.
- Supporting ongoing workshop inventory management exercises.
- Write and update process sheets to ensure accurate methods of construction are maintained for all Workshop produced parts.
- Assist with electrical harness rework and repair.
- Assist with special projects to expedite the fast turnaround of parts and assemblies as may be required to fulfil urgent customer orders.
- Provide cover for supervisor responsibilities in the Workshop during holiday sickness and absence.
- Maintain the workshop and equipment in clean and safe order.

Qualifications & Experience:

- Able to adapt to a busy working environment.
- Experience of working to tight deadlines.
- Experience of working in a team environment.
- Good understanding of automotive components.
- Knowledge of Aston Martin model variants both current and historical.
- Able to read and interpret technical drawings.
- Knowledge of in-house capacities, processes and production methods.
- DCS based knowledge.
- Ability to use specialist software used in the workshop environment.
- PC/telephone skills; computer literacy including word, excel and access; driving licence.

To apply:

Applicants should submit a CV and covering letter to careers@astonmartin.com. Please state your hourly rate and/or salary expectations.
